FEATURES

- Specifically designed for use with an impact driver
- Screwdriver bits are secured magnetically for accurate driving
- Quick-release mechanism
- Manufactured from chrome vanadium steel and stainless steel
- The shock absorbing torsion design increases torque performance

DESCRIPTION

This 1/4" hex impact magnetic bit holder is manufactured from chrome vanadium steel, which is correctly hardened and tempered for strength and durability. It has a blackened hex shank and body for extra grip. The screwdriver bit is secured magnetically for accurate driving and there is a pull-back collar to quickly release it. The shock absorbing design increases torque performance. Specifically designed for use with an impact driver.
