- 4.3" colour display with black and white mode and adjustable contrast
- IP67 - suitable for short periods of immersion in water up to a depth of 1m and dusty environments
- Compact lens suitable for narrow pipe inspection
- Suitable for real-time observation
- Supplied with accessories including hook, magnet and mirror

DESCRIPTION

This 8mm inspection camera features a semi-rigid cable, making it ideal for examining wall cavities, pipes, and other narrow spaces, as well as for closely inspecting engines and hard-to-reach machine parts. The camera's brightness is adjustable, thanks to eight built-in LEDs. It has a large colour display that also includes a black & white mode and adjustable contrast settings. The camera is rated IP67, meaning it can withstand short periods of immersion in water up to a depth of 1 meter and is suitable for use in dusty environments. It allows for real-time observation without the need for Wi-Fi or a mobile app. The device is powered by a rechargeable lithium-ion battery that provides up to five hours of run time, and a USB-C charging cable is included. Supplied with useful accessories including a hook, magnet and mirror.

CONTENTS

1 x Endoscope
1 x Hook accessory
1 x Magnet accesory
1 x Mirror accessory
1 x USB-C charging cable
3 x Spare fixing covers
