WARRANTY 12 months parts and labour

FEATURES

- Short shaft constructed of spring steel bars and a steel locking plate to secure the head
- Induction hardened
- forged head
- Vulcanised rubber handle absorbs impact and vibration
- Steel reinforced lanyard hole

DESCRIPTION

This club hammer from Estwing has a short shaft made of spring steel bars and a steel locking plate to secure the head to the shaft. The drop forged head is induction hardened and small, allowing precise and controlled strikes. The vulcanised rubber handle absorbs impact and vibration, reducing user fatigue. Finally, it has a steel reinforced lanyard hole for safe and secure tethering.

The Estwing Indestructible series is designed to resist breaking during normal use.

ESTWING sledge hammers and striking tools are manufactured generally in accordance with BS 876
