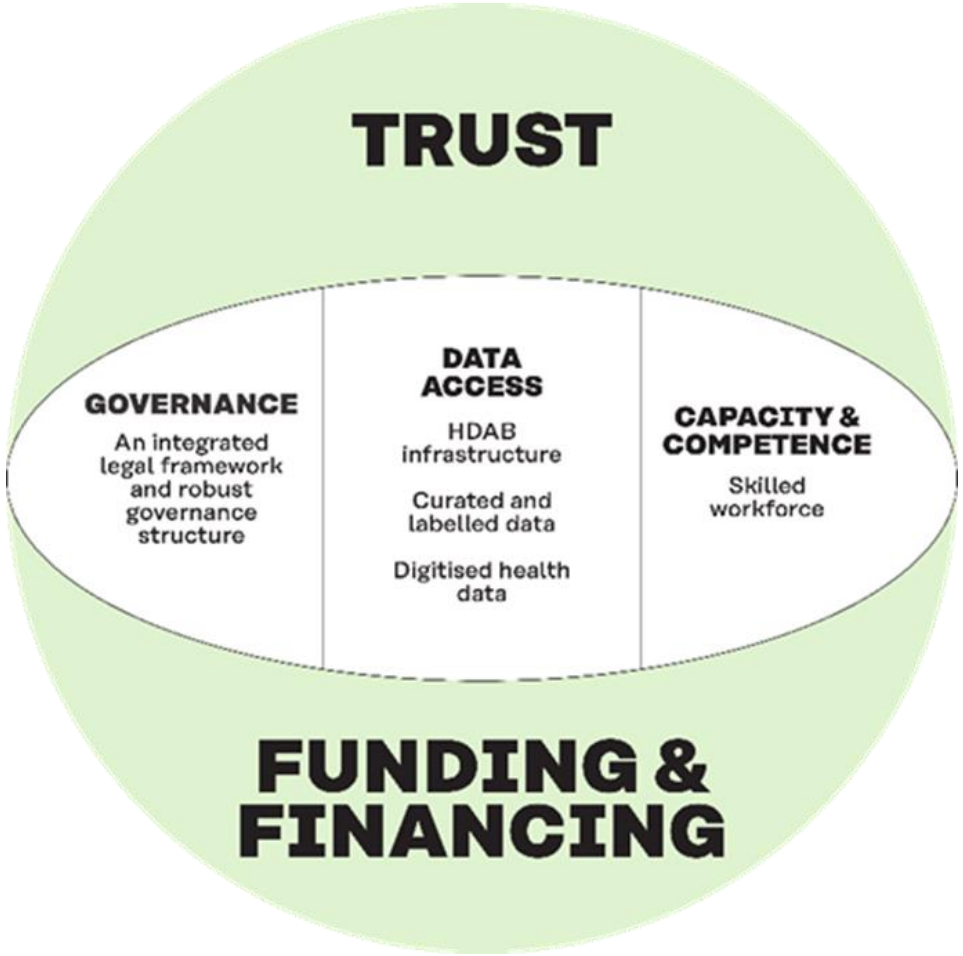
TEHDAS sustainability plan findings

- The Sustainability plan proposes a framework that integrates **five dimensions of sustainability**, which are essential for successful implementation of the EHDS2 and for secondary use of health data.
    1) Clear legal basis and robust governance structure,
    2) Access to quality data,
    3) Capacity and competence,
    4) Trust among citizens, professionals and policy makers, and
    5) Funding and financing.
- The framework was used to develop **recommendations for action** to be taken at Member State and EU level to address the sustainability needs in the short and medium term and in the long run.
- The **EU funding** plays a vital role in building the cross-border access to data but **Member States need to invest** into the national systems to make data available.
- The **benefits, costs and resource needs** are different for different actors: data holders, data access bodies (HDAB) and users.
- Most **costs of the data access, and charged by the HDABs**, are downstream costs of making data available by data holders.



Co-funded by the Health Programme of the European Union

Second Joint Action Towards the European Health Data Space ~TEHDAS2

Procedure type	Direct grant (joint action) to Member States
Partners	Authorities from 30 Member States
Total Budget	EUR 6 M (80% EU Support)
EU/MS Contribution	EUR 4,8M + EUR 1,2M
Start of the project	1 May
Duration	32 Months
Coordination	Sitra
Contract management	HaDEA

Co-funded by
The Health Programme
of the European Union

TEHDAS2 in brief

The European Health Data Space and results of previous projects

TEHDAS2 objectives

General objectives

1)Implementation of secondary use of data in EHDS

2) Develop collabor-ation

Specific objectives

1. Discovery and enrichment
2. Access to Data
3. Secure processing
4. Engaging citizens
5. Collaboration models

Output

TEHDAS2 results – guidelines and technical specifications

- Increased preparedness for implementation
- Coordinated implementation of the EHDS2
- Results endorsed, incl. implementing acts

Outcome/impact

- Boosting health research and innovation
- Knowledge-based policymaking
- Efficient use of healthcare resources
- Improved public health and healthcare
