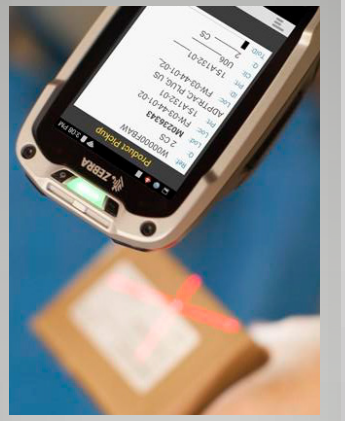
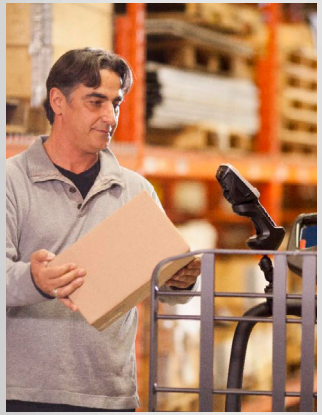
Day in the Life: Warehouse

Zebra for Android devices simplify operations and automate processes across the warehouse, from goods in to ship out.





1

AT GOODS IN

Jake uses the Mobility DNA SimulScan application on his TC8000 to quickly scan delivery documents. The results are highly accurate. Each document contains multiple bar-codes, images, check boxes and lines of text, but SimulScan takes it all in and populates whole digital forms in one scan. Jake's received and logged the goods deliv-ery in seconds.

2

PUT AWAY

Now the goods have to be put away, which is not a one-man job. The touch screen on Jake's TC8000 adapts to him wearing gloves, so he can easily summon help with a group voice message, using the PTT Express function within Work-force Connect.

3

PICKING

The hands-free feature on her multi-modal WT6000 wearable computer helps Sandy complete picking tasks faster. With TekSpeech 4 Pro allowing direct voice contact between operatives at any stage of the warehousing process, Zebra for Android helps to boost productivity for WT6000 users by 15%, with 39% fewer errors than speech-only wearables.

NO-TILT SCANNING – screen faces the user

UP TO 33% LIGHTER than traditional models

ALL-TOUCH KEYBOARD – 40% faster, 60% fewer errors

HOT-SWAPPABLE battery for uninterrupted use

BALANCED FOR COMFORT – 15% less muscle effort

TUMBLE-TESTED and sealed for work in tough environments

4

DROPPING

Sandy catches her WT6000 on a storage cage. It doesn't matter. It's built to withstand impacts, dust and water in the toughest of warehouse environments.

5

PACK AND SHIPPING

Lucy can pack and ship faster and more accurately than ever before, as TekSpeech Pro makes it easy to follow voice directions.
