iOC iTero Orthodontic Software
A Digitally Perfect Orthodontic Impression

Optimal Control
The iOC Scanner improves diagnostic acuity, treatment planning, and chairside consultation with the patient.

Digital orthodontic scanning removes the uncertainties associated with conventional alginate and PVS impressions.

Optimal Convenience
Intuitive software and automated prompts facilitate ease of use and widespread adoption by office staff.

Optimal Connectivity
The iOC digital technology enhances patient communication and accelerates treatment acceptance.
iOC iTero Orthodontic Software
A Digitally Perfect Orthodontic Impression

For the Orthodontic Practice

- Eliminates impressions, the most invasive procedure in daily orthodontic care
- Superior accuracy with no distortion from the patient movement during set, removal of impression or disinfection
- Onscreen visualisation allows for immediate adjustment to create the ideal orthodontic scan
- No impression mess to clean up
- Clincheck available within 48 hours for Invisalign cases
- Auxiliary staff are able to take the perfect impression first time every-time
- Virtual storage of study models

For the Patient

- Less anxious impression experience
- Fewer repeat appointments
- Eliminates the goop, gagging and patient discomfort
- "Wow" factor - the patient can actually see the impression and visualise treatment
