

To further address business needs, BeesApps integrates audio and photo to its professional note-taking app Beesy.

Already handling structured note-taking, smart automated To-Do lists from meeting notes, as well as drawings, plans and web pages, Beesy HD now integrates audio and photo import, making sure business people can replace their paper notebooks and do not miss anything during meetings.

**With Beesy HD, no more paper for taking notes at work.**

Beesy is a business note-taking application. Using a fast structured note-taking system and enabling instant meeting minutes, Beesy improves meetings productivity and priority follow-up. And since most actions are assigned or updated during meetings, Beesy automatically generates actions from notes, allowing users to easily browse them afterwards by action types, people or projects until their achievement.

Using Beesy’s new HD version at work further enhances business productivity:

- To focus on the meeting and its participants but do not miss any important part of it, Beesy HD adds support for audio recording inside notes.
- To fully discard paper notebooks, Beesy HD adds high-resolution photo import to notes.

With Beesy HD, iPad business users can really enjoy PenLess Meetings.

**Beesy creates the first pro-active audio recording to help better capture all essential moments of a meeting.**

Beesy’s new version improves its fast note-taking ability in meetings by using audio recording directly within notes:

- The first real timeshifting tool for business meeting: as soon as the user taps on the “record” button, Beesy will already have pre-recorded the last 2 minutes.

- Users cannot miss essential moments during a business appointment while focusing on the participants: Beesy will help business users go back in time.
- Directly embed audio files in notes and easily integrate written comment in the meeting note.
- Attach the audio file to the meeting minutes and email it to participants.

In meeting, Beesy’s audio recording stands out among traditional recording process with new and enhanced features:

- A simplified ergonomic: no need to start or stop a recording to be able to save the main moments of a meeting.
- Only recording the essential moments for the user and thus reducing the record size, Beesy enables users to really use audio files from notes.

With Beesy's TimeShift feature, being too late to record a key moment in a business appointment is now over.

**Taking photos with Beesy**

Using Beesy HD, users can now take photos or import them from their library and easily add them to their notes:

- Enhanced high resolution retina Photos
- Compatible with iPad 2 and iPad 3 camera
- Import photos from iPad's library;
- Comment or draw on pictures
- Add pictures to meeting minutes;

With Beesy HD, no more excuses for using notebooks and papers at work.

**A new Beesy's version 100% HD Retina compatible.**

Beesy enhanced its user interface to support HD and gives business customers the best solution for taking notes. Indeed, using HD, Beesy provides a greater usability and readability for tireless meetings. Beesy HD provides unaltered HD quality content within the notes as well: photos, drawings, plans and web pages are all handled in HD resolution. Besides, icons and design have been fully updated in high resolution for a full business-grade application.

With Beesy, HD retina turns out to be a professional need.

**About BeesApps:**

*BeesApps is a Paris-based start-up delivering iPad personal productivity solutions for business people. Founded in 2011, BeesApps aims at making business people more productive using their tablet. One year ago, BeesApps started developing Beesy, a smart note taking and automated task management App for iPad. Beesy is currently ranked in the TOP30 French productivity store.*
