Additional comments from attendees

- A well thought through event. Good information and exciting news.
- Thank you very much for invitation. I really enjoy the presentation, and i am a happy to attend on the next invitation Medicine for Members.
- Thank you for the opportunity to be better informed through these lectures and for the work these admirable medics undertake.
- More about HIV treatment and HCV cures.
- I felt the topic re the event was useful but presentation a little ropery. I also sensed that the CLINIC is very focused on what it has to carry out, but the OUTREACH work needs much more exploring and a lot of consideration. They say visit schools. Which schools? I worked in over 150 schools in London as a Drama Specialist and they never came to any of the schools I worked in. Further I have never seen any publicity on that particular clinic. In fact I was not even aware it existed. I mean can you just walk in? So many questions.
- The lecture was very interesting.
