How well could you hear the speakers?

VERY WELL → **NOT VERY WELL**

35%	42%	12%	8%	3%	Positive 89%
-----	-----	-----	----	----	-------------------------

Additional comments from attendees

- The two talks we have attended 1) Cancer Research UK 2) Dementia were very well presented. Thank you for organising.
- So interesting and an excellent speaker.
- I find these talks very interesting and it is 'warming' to see the hospital (my local hospital) with a 'community' view/engagement, rather just then when I am 'ill'
- I really enjoyed the presentation from all speakers, especially from Danielle. Big compliment for her.
- The presentation was very good, but it would have been good if all the team were given a little bit more then what little bits they did - they were obviously very proud of their achievements so it would have been good for everybody to take a more active role in the presentation
- Lady introducing spoke too long. She was standing and interrupting Danielle which I think was bad really. Should only introduce for 2 minutes then move one not give talk yourself. Thank you Danielle
- The only problem I had with the last event was that I found it to be a little repetitive.
- Seating and refreshments and range of speakers all very good
