<b>No. of evaluation surveys completed:</b>	58

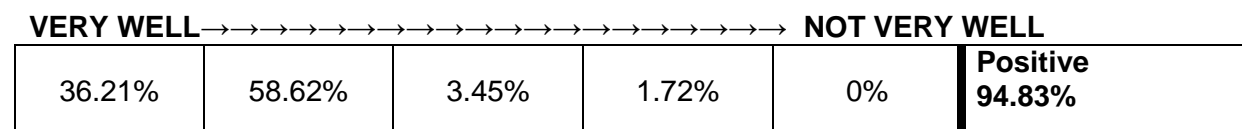

How engaging did you find the talk?

How informative/useful did you find the event?

How well could you hear the speaker?

- Additional comments from attendees
- I was very pleased that he covered more problems as well as Parkinson's, which he had covered previously
  - The content was excellent, but the delivery was a bit dry.
  - I approached Professor Schapira at the end of the talk and he very kindly answered my question.
  - I liked the speed at which the Professor spoke - not too fast - really helpful for a non-medical person, as I am.

- Fascinating talk.
- An engaging speaker who from the moment he started his lecture drew you into the world of neurology.
- Informative and educational.
- "I was very encouraged by the progress being made treating diseases like M. S. and Parkinson's.
- I was very happy with the information I got. Very educational.
- I gave my name to someone on the desk at the entrance to the atrium and she ticked a sheet, so I should have been recorded as present. This talk was one of the best I've attended. The speaker was humorous and informative and I liked the accompanying slides. Very good indeed.
- It's always a problem. . Never enough time to answer questions. I missed out! That's what happens when you have a good topic, and an even better speaker!
- A very informative lecture and speaker.
- An excellent talk as always. We are so privileged to have such gifted and intelligent people looking after us. Thank you.
- I found the talk very interesting and informative.
- The room was very warm.
- He is excellent.
- I was so impressed by the depth of knowledge shown by the speaker. It was particularly noticeable when he was answering questions after his talk.
- Convey my thanks for very good presentation.
- The talk was excellent, even a layman could understand it!
- Delivered the lecture very well and in simple language for everyone to understand.
- Professor Schapira started in such a calm measured tone that my immediate thought was that we wouldn't cover much, but in fact we did cover a great deal, with superb efficiency. I particularly liked the way he answered even compound questions so very clearly.
- Extremely well balanced lecture - a wide ranging guide to the subject.
- Very good lecture. Maybe would have been good to have more time for questions?
- The event was very informative, the speaker very knowledgeable and the subject fascinating, making the whole something of a special treat.
- The presentation was very good with clear structure delivered with clarity.

- Speaker is knowledgeable and had command on the subject.
- Wonderful, I wasn't well enough to stay till the end. More comfortable chairs and seating at the rear would have made concentrating easier with my neurological condition.
- Very informative. History of personalities important in early treatments very interesting. Use of new technologies exciting. Wanted to attend as friends and neighbours are affected by some of the disorders mentioned. Took a Parkinson's leaflet for a friend.
- "Very good articulation of historical ventures in neurology. From the various questions it is evident that the professor struck a responsive chord from the audience".
- This is a very gifted speaker, in terms of clarity, pacing, sustaining interest - and what a fascinating subject that touches us all in one way or another!
- There were minor sound problems - a 'ping' on the microphone.
- Fantastic speaker not too over my head. Room very warm.
- Very informative well-constructed lecture with sufficient information and not too technical. Perhaps more information on prevention!
- Very clearly presented. Would have liked less history and more future prospects.
- It was a most informative and interesting talk and Prof Schapira delivered it with charm and humour. His response to the questions was excellent and he obviously has an enlightened and human approach to patients.
- "The hearing loop did not seem to function despite me sitting in the area advised. Fortunately it didn't matter too much as the PA system was clear as was the diction of the speaker(s).
- The topic was of great interest and Professor Schapira managed to deliver a very interesting and understandable lecture even to a non-medically trained person like me. "
- It was such a privilege to be part of the event.
- "I was satisfied of yesterday lecture and had too many questions related but limited time. Marvellous Prof speaker a true scientist.
- I would like to participate in future evolutions.
