

Make a clay double helix

What you need:

- Modeling clay
- PVA glue
- Poster paint (optional)
- 4cm long colourful sticks or straws

- Take a lump of clay the size of a small fist and roll it into 10 or so small balls.
- Join the balls together with the sticks or straws to create a double helix shape (see photos).
- Mix some poster paint with a small amount of PVA glue to make the paint stick to the clay better.
- Paint the clay balls or leave them plain and then leave to dry.
