

Make jewel jean pocket

What you need:

- The back pocket of a pair of jeans
- Fabric paint
- Glitter
- Sequins, stick on jewels and any other stick on accessories

- Dig out old pairs of jeans and cut out the back pocket in a square shape.
- Use the jean pockets as canvasses and encourage your children to decorate however they like.
- Allow the children to use fabric paint or fabric pens, glitter, stick-on-jewels, sequins, and whatever else they like to decorate their pocket canvases.
- Once dry you can frame the pockets either on some thick card with another colour card border- or if you have one, in a clip frame.
- As an extra-add on you could create a denim mural with all the children's denim pockets together.
- You could display all the children's art together in a Jeans for Genes exhibition and ask parents to pay £1 to come and view their children's art and donate the proceeds to Jeans for Genes.
