

# 8th Slovenian Conference on Graph Theory

[kg15.imfm.si](http://kg15.imfm.si)

21-27 June 2015

The 8th Slovenian Conference on Graph Theory will take place from June 21 to June 27 in Kranjska Gora, Slovenia. We are proud to announce that we will host 9 distinguished plenary speakers and 14 minisymposia covering different areas of Graph Theory.

The registration is now open! You can register on-line through the web page: [kg15.imfm.si](http://kg15.imfm.si)

Within registration you can request that we book a room for you in one of the two hotels associated with the conference. Beside a single room it is also possible to book a double room, either sharing it with an accompanying person or another participant. In the latter case you will be asked to specify with whom you want to share the room. Note that the number of rooms in the two hotels, for which a special conference price has been negotiated, is limited, hence an early registration is advisable.

The reduced conference fee for early registrants can be applied if paid by May 15th. The conference fee can be paid by bank transfer; see the web page for details. Alternatively, it can also be paid by credit card (with the additional 10EUR charge); details will be available on the web page soon.

The information about the airport transfer will follow in due time, and will also be announced on the conference web-page.

## Plenary speakers

- Michael Giudici (The University of Western Australia, Perth, Australia)
- Michael Henning (University of Johannesburg, South Africa)
- Brendan D. McKay (Australian National University, Canberra, Australia)
- Alexander Mednykh (Sobolev Institute of Mathematics, Novosibirsk, Russia)
- Joy Morris (University of Lethbridge, Canada)
- Gábor Tardos (Hungarian Academy of Sciences, Budapest, Hungary)
- Carsten Thomassen (Technical University of Denmark, Lyngby, Denmark)
- Thomas Tucker (Colgate University, Hamilton, USA)
- Douglas West (Zhejiang Normal University, Jinhua, China, and University of Illinois, USA)

## The minisymposia

**Applications of Groups in Graph Theory** - Christopher Parker (University of Birmingham, UK)

**Association Schemes** - Ilya Ponomarenko (Saint Petersburg Department of V. A. Steklov Institute of Mathematics, Russia)

**Chemical Graph Theory** - Xueliang Li (Nankai University, Tianjin, China)

**Combinatorics** - Matjaž Konvalinka (University of Ljubljana, Slovenia)

**Finite Geometry** - Tamás Szőnyi (Eötvös Loránd University, Budapest, Hungary)

**Graph Domination** - Paul Dorbec (Université de Bordeaux, LaBRI, France)

**Graph Imbeddings and Map Symmetries** - Jonathan L. Gross (Columbia University, New York, USA)

**Graph Products** - Richard Hammack (Virginia Commonwealth University, Richmond, USA)

**Large and Dynamic Networks** - Vladimir Batagelj (University of Ljubljana, Slovenia)

**Metric Dimension and Related Parameters** - Ismael González Yero (Universidad de Cádiz, Spain)

**Polytopes and Graphs** - Egon Schulte (Northeastern University, Boston, USA)

**Spectral Graph Theory** - Dragan Stevanović (Serbian Academy of Science and Arts, Belgrade, Serbia and University of Primorska, Koper, Slovenia)

**Structure and Properties of Transitive graphs** - Robert Jajcay (Indiana State University, USA)

**Vertex Colourings and Forbidden Subgraphs** - Ingo Schiermeyer (Technische Universität Bergakademie Freiberg, Germany)

The minisymposia organizers are also invited speakers.

Sandi Klavžar (Chair of OC)
