The following shows how to reduce total environmental impact (e.g. energy use) of the cooking process).

- (1) Try not to open or close the oven door frequently during cooking.
- (2) Keep the oven door clear so that you can look in during cooking easily.
- (3) If possible, defrost frozen food in a way which does not need any power consumption.
- (4) It takes less time to cook food which has large surface area to volume ratio.
