

ABAT-JOUR CONIQUE

Jean Prouvé, 1947

During the 1940s, Jean Prouvé designed the wall lamp Potence for his own home in Nancy.

A simple lamp mounted on a long, rotating metal rod supported by a steel wire.

In 1947 Jean Prouvé developed a conical lampshade to match with the different versions and sizes of the Potence. Jour Conique is the first lampshade he designed for the Potence.

It is simply placed over the light source and can be removed again if necessary.
