

Erasmus plus project 2016- **2018**

We have been successful in our bid to fund a two year project working with 5 other schools in Europe.

The countries involved are England, France, Spain, Denmark and Greece.

Our project is called ‘ Connect and Unite’

We will work with project partner pupils and staff sharing ideas and working collaboratively.

There will be visits (called mobilities) for staff and pupils to other countries and we will host visitors at our school.

Our theme for year 1 is Building Bridges.
This theme will be interpreted both

literally and metaphorically. Children will visit local bridges, design their own bridges, look at the work of famous engineers , artists, mathematicians and scientists and they will share this work with our partner schools across Europe.

We really look forward to this exciting project and all the myriad of learning opportunities it will provide for our whole school community.

Do please check out the new link on our websites for regular updates on the project and our international links
