

# WHAT IS AUTOPILOT?

.....

Autopilot is an overview of the day ahead which can be accessed anytime, anywhere, as long as your device has connected to the Internet at some point that day.

## The benefits

- > **Pulls in key information** about your day, including what your first call is about, who your next meeting is with and, so long as you're connected to the internet, how to get there.
- > **Automatically creates reports** before you've even woken up. By synchronizing your MyCalls calendar once a day, sales-i's Autopilot features takes all of the legwork out of your morning prep.
- > **Delivers valuable pieces of account information** right to your mobile device so you don't need to delve deep into the system to find what you need in an instant.
- > **Stores key information offline**, so as long as you've connected to the Internet at some point in the day, you'll be able to stay in the loop, no matter where you end up.

### How much does it cost?

You can pay if you want, but we're giving Autopilot away for free. It's just another feature to keep you one step ahead of your competitors.

### How do I download it?

You don't need to download a thing. Just make sure your sales-i app is up-to-date and Autopilot will be available at the log in screen.

### How do I log in?

Open the app. Just below the Username and Password section, you'll now find a big blue Autopilot login button.
