ICO HeadStart and SID Limited, announce their partnership listing SID Limited on the ICO HeadStart platform

GIBRALTAR, Gibraltar - Jan. 29, 2019 - PRLog -- Nawid Habib, CEO and Co-Founder of the HeadStart Group ("[ICO HeadStart™](#)") and Jose Merino, Chairman and Co-Founder, of [SID Limited](#) ("[SID Limited](#)") announce herewith entering into an Agreement to list the SID project on the ICO HeadStart™ platform.

SID Limited is a developer of a crowd-sourced, Stellar blockchain-enabled, internet sharing system. SID which stands for "Share Internet Data" allows Mobile or Wi-Fi internet to be shared from one person's Android smartphone to another nearby smartphone or tablet OR to share WiFi's shared by the community itself to each SID member Android or iOs smartphone. The potential of this SID technology to complement existing technologies to increase the time a smartphone or tablet is connected to the internet through the sharing economy, has been the key driver behind the decision of a partnership.

SID - ICO HeadStart Partnership

"We are looking forward with great expectation to contribute to the recently announced partnership between ICO HeadStart™ and SID Limited to offer the ICO HeadStart™ Community the possibility to participate in this exciting project through the ICO HeadStart™ platform. There is a lot of room in the internet-sharing market segment space considering the countless issues with internet connectivity and security that smartphone users experience every day," says Nawid Habib of ICO HeadStart™.

Both parties agree that by having a vested business interest in each other's Token as well as a joint Product Business interest is the way to ensure both will help each other succeed, a real partnership in the true sense of the word and one of the founding principles of ICO HeadStart™.

"The SID technology allows internet connectivity to be shared from one person's Android smartphone to another person's nearby Android smartphone and also allows SID users to share Wi-Fis with the wider community, so you don't need to remember a password but simply connect through your SID Android and iOs Apps. According to Statista, in 2018 already, there were 16 times more smartphones than public Wi-Fi hotspots globally, which re-enforces the massive market potential for the SID technology to become one of the future connectivity platforms" he added.

"The mobile apps of multinational corporations, which SID is targeting as future clients, require a secure internet connectivity between the service providers, like Dunkin' Coffee, UniTaxi and other multinational firms provide their services through the internet to their users during as close as possible to 24/7 as this is crucial to the growth of their business. The SID technology is bound to make a direct impact on revenue and customer loyalty by increasing the time users Apps are connected to the internet on a monthly basis," says Jose Merino, Chairman and Co-Founder, of SID Limited. "We have watched as society has become more and more dependent on the internet, but most businesses have become totally dependent on the internet and this is the perfect solution so that future end-users, small business- or multinationals business- clients can access their product offerings through SID's internet connectivity improvement during more time in any given month."

"The ICO HeadStart™ team has a strong knowledge and experience in conducting a successful past ICO as well as real world multinational projects experience with multinational clients around the world. Their willingness to be involved with SID Limited at different levels of our business, and in particular their contribution in the SID Tokens sale partnership announced herein, will get us a step closer in the execution of our company mission to bring along the social impact the Founders of SID Limited and ICO HeadStart™ set out to bring along," said Jose Merino, of SID Limited.

About ICO HeadStart™:

ICO HeadStart™ is a platform that expertly pre-screens ICOs listing the top 3% of the most promising ICOs for you to participate in. Once ICO HeadStart™ lists the projects on their platform, it's up to their community to select their favorites. Here's where the 'Wisdom of the Crowd' kicks in! Projects that receive sufficient votes to reach their soft cap, will be successfully funded!

January 2019

Tu	Mo	Su	Sa	Fr	Th	We
29	28	27	26	25	24	23

Furthermore, ICO HeadStart's platform has a social impact twist inherent in its product design and being part of its business model to be a fundraiser for top tier blockchain or tokenization projects to benefit a wider community of small and large contributors alike.

The crowd sale of the SID project on the ICO HeadStart™ platform commences on March 1st, 2019.

About SID Limited:

SID Limited is a tech start-up created to boost the global internet connectivity with its already developed new innovative technology which gives users a simple and efficient way to share crowd-sourced internet access with others of the SID community. The SID team have extensive tech and telecom backgrounds, including ex-leadership positions in major blue-chip companies.

- Aims to enable a global internet access boom and thus help to lift certain segments of the 500 million poor people out of poverty, through the provision of internet connectivity, in support of the United Nations number 1 SDG (sustainable development goal).
- Provisioning of internet connectivity is aimed to be achieved by crowd-sourcing internet from users of the SID community and share it with the wider SID – Sentinel network community, even to those who cannot afford to pay for it, through a future Ads based model.
- SID technology is not only about sharing internet originated by Wi-Fi but actually shares also Mobile originated internet.
- The system is fully decentralized, whereas Apps on smartphones can function even if the servers are not reachable temporarily or even down for a longer period, while the sharing of the internet of the SID App user is strictly and only a decision by such user, which is the ultimate of decentralization.
