SID Limited in support of United Nations' international day for the eradication of poverty

GIBRALTAR, Gibraltar - Oct. 20, 2018 - PRLog -- In view of the "United Nation's international day for the eradication of poverty on 17th October" SID has started on October 12th, 2018 a prolonged campaign in which it will distribute up to \$ 2.5 million dollars' worth in SID Tokens to projects aimed at bringing Internet access to developing and developed countries alike, aimed to those who can't afford a regular monthly internet connection.

The global platform for Internet sharing, SID, will give \$ 25 worth in SID Tokens to each user who contributes by purchasing SID Tokens and SID will contribute another \$ 25 worth in SID Tokens for future projects to extend Internet access to the

photo_2018-10-12_22-45-44

of SIDT equivalent to \$ 25 on account. (T&C's apply).

The projects to which the funds are aimed to be allocated in future could be proposed through the official SID Telegram groups (in English and Spanish) and Token holders would be able to vote on the projects they consider more interesting. Those that are finally elected will receive the funds assigned in SID tokens by the SID team.

Jose Merino, Chairman of SID, commented: "Our goal is to grow into a global freemium internet community platform, where everyone has the opportunity to access the Internet, and therefore, have access to culture, information, education and new opportunities through e-commerce to combat poverty and develop less favored areas and people. With this initiative we also want to help with concrete actions in projects that are strongly aligned with our mission".

In order to strengthen the reach, SID has been leading the formation of a Consortium of Partner Companies or **Group of Partner Companies (GPC)** to mitigate the effect of the current bearish crypto market conditions and have long term positive effects on its members by: helping to promote each others' products, tokens and business, complete the product offerings by combining products from the Group of Partner Companies (GPC) with the aim to in future to present it as one GPC entity to multinationals, governments and medium to big size private or public companies to create additional revenue for the GPC. Companies like SENTINEL (crypto ticker: \$Sent) and URAllowance have already formally joined Partnership with SID and at least 2 more are about to be announced soon. Also we are pleased to have a VC backing SID, as recently press released by LDJ Cayman Fund.

SID is an internet sharing platform accessed through the already released SID iOS and Android Apps or through 3rd party Apps like Dunkin' Coffee's APP (with SID tech inside) nationwide in Spain. Before the end of 2018 SID will release the sharing of internet Megabytes in exchange for SID tokens, so that each SID user can have greater and better access to the internet or become a de facto on demand mobile access point to the internet. SID community users will be able to earn SID Tokens when sharing their mobile internet or their home Wi-Fi (subject to Mobile or Fixed ISP T&Cs) yet public Wi-Fi hotspots will always be shared for free or Mobile or Home Wi-Fi can also be shared for free by those Users who so

needed. In this way SID is showing its commitment to the company mission, namely to help the less fortunate to avoid poverty through universal access to the Internet, and therefore access to culture, knowledge and new technologies that provide equal opportunities. This campaign is available from its website.

Users can now register and those who make a contribution from 12 October till 30th December 2018 will receive an extra amount
