Jose Merino Chairman of SID Ltd #Blockchain enthusiast #Cryptocurrency #Sale SID Tokens is ... 12 horas • Editado

SID announces the collaboration with UR Allowance. In an effort to encourage cross promotion between complementary ICOs. SID Limited announces that URA tokens are an acceptable payment form for the purchase of SID tokens.

URAllowance introduces something new called Family Smart Contracts which is a way for families to use smart contracts. What attracted my attention was the powerful mix when combining all our current & future partnerships to complement each other's product and business and Cross promotion between partners.

So far SID and it's partners provide a more powerful product offering combined then each could do on their own, with:
-> SID Ltd providing Internet Connectivity.
-> Sentinel providing Internet Security.
-> URAllowance providing crypto education.

As a "Group of partner companies" we will be looking for other ICOs that complement our product offering, like adding to this "Online Advertising", "Blockchain technology", "Token Swap Exchange", "e-banking Cryoto/fiat/sepa & Swift bank-account", "Cryoto investor firm". Any ""group partner" is expected to provide its products and facilities for the group companies and it's combined customers thus all benefiting from the combined group power.
