

Introducing the Sky Q Hub

Transform all your Sky Q boxes into Wi-Fi hotspots with Sky Broadband.

Our new Sky Q Hub uses 5GHz wireless AC and has built in Powerline networking technology, allowing it to use your in-home electrical wiring as well as Wi-Fi to communicate with Sky Q boxes, automatically using the best connection available.

The Sky Q Hub turns Sky Q boxes into Wi-Fi hotspots, delivering a more reliable home Wi-Fi experience, with better Wi-Fi coverage throughout your home.

Design features

Discreet form that carries the sleek design of the Sky Q boxes

Dimensions: 211mm x 141mm x 34mm

Weight: 0.45kg

Colour: Matt black and hi-gloss black

Physical connections

- 2x 10/100/1000 Mb/s Ethernet RJ45 port
- 1x DSL port
- Mains (Mains input 230V)

Connectivity

- Supports and automatically detects ADSL2+ and is backward compatible with ADSL
- Supports and automatically detects VDSL2 and be backward compatible with VDSL to support Sky Fibre
- Works dual band on 2.4GHz and 5GHz concurrently
 - 2.4GHz 801.11n is 2x2 MIMO - Back compatible with 802.11 b/g
 - 5GHz 801.11ac is 3x3 MIMO - Back compatible with 802.11n
- Supports Powerline AV1.1 - only compatible with other Sky devices. Not available at launch
- IPv6 support

Security

- Support WPA/WPA2 with WPA-PSK/AES and TKIP security
- Support WPA2/AES

Power consumption / Power saving features

- "Network Standby" mode which uses less than 12W of power within twenty minutes of no use

Believe in better
