

TASK 5: WHO YA GONNA CALL?

If you are trying to help someone and they are unconscious, you can't help them on your own and you need some extra help.

-What is the number to call for that help and who do you need to come?

YOU SHOULD ONLY RING 999 FOR AN AMBULANCE IF YOU REALLY NEED IT. IF YOU RING WHEN YOU DON'T NEED TO THEN SOMEBODY MIGHT GET HURT OR MORE POORLY!

Take a listen to our practice 999 call.

It is important for your child to have an understanding of what they might hear if they ever did need to call for help. **Please have a listen and then get your child to answer the questions asked by the call taker.**
