In light of the Government announcement last night, we have reviewed all aspects of health and safety within our School.

Whilst we have a robust risk assessment for the school environment and practices, we must take into account the safety of pupils, staff and local community to reduce the transmission of Covid-19.

It has been recognised by Government and SAGE that schools are vectors for transmitting the disease causing the virus to spread to households.

Therefore, to reduce the spread of the virus we have reduced the number of children who can attend the school to Key Worker families and vulnerable children only until further notice.

We understand how difficult this will be and appreciate your support in this matter.
