## Socrates Message

This update manual documents the updates that have been made to Socrates GP in release version 2.6.6.2. This release includes an update to Healthmail attachments, Healthlink Referrals together with some user requests.

Socrates GP (version 2.1.1.0) onwards is Windows 10 compatible.

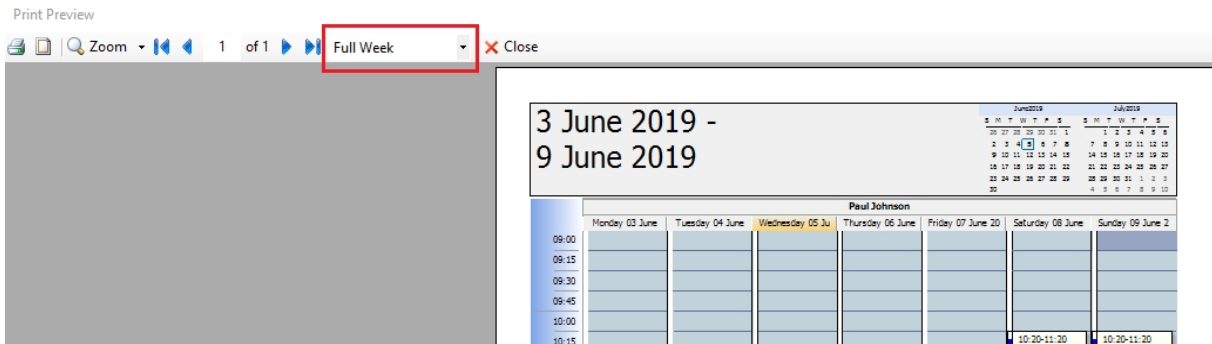

We hope you continue to enjoy using our product and we look forward to receiving your feedback.

***Socrates Team, Clanwilliam Health***

# 1 Appointments

## 1.1 Print Schedule

You can now print a 7 day schedule from Appointments. Select the Print Schedule button and then select Full week from the dropdown list.

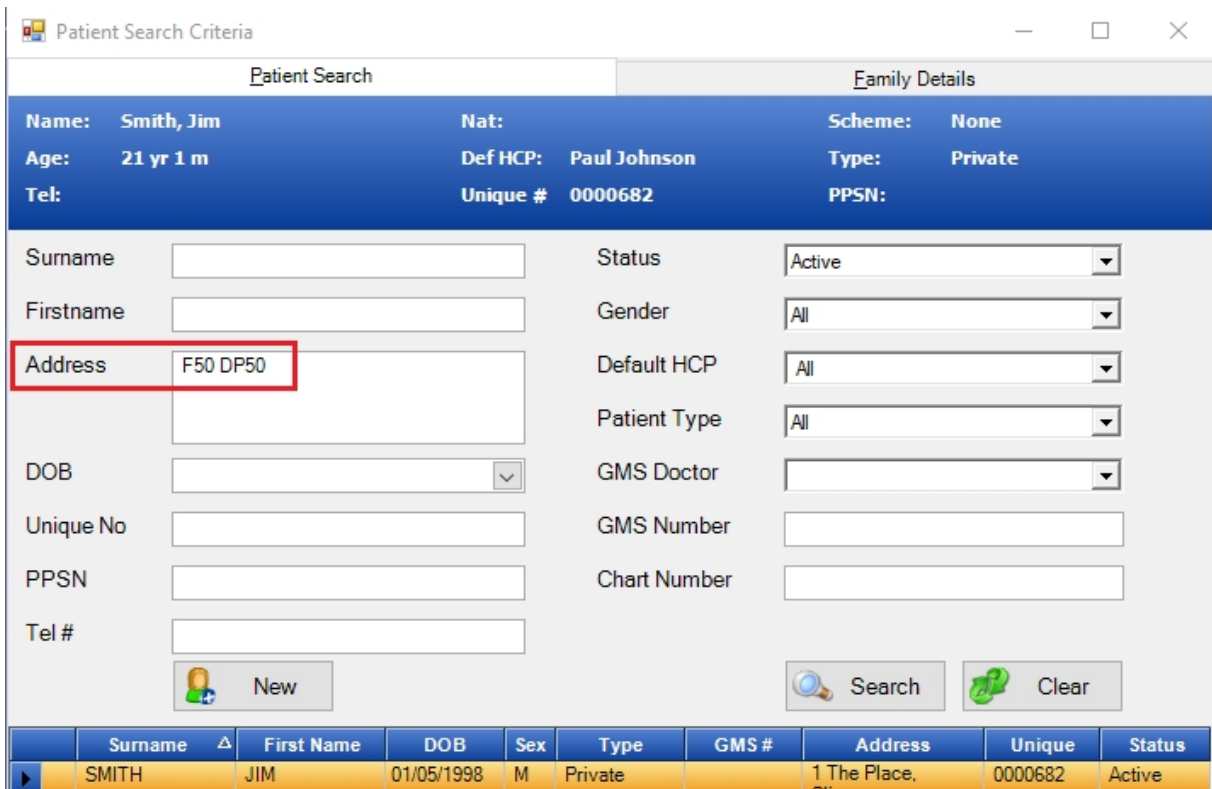

## 1.2 Appointment Permissions

When a user has read only access for adding and editing appointments they can no longer drag and drop an appointment to a new appointment slot.

# 2 Patient Maintenance

## 2.1 Patient Search

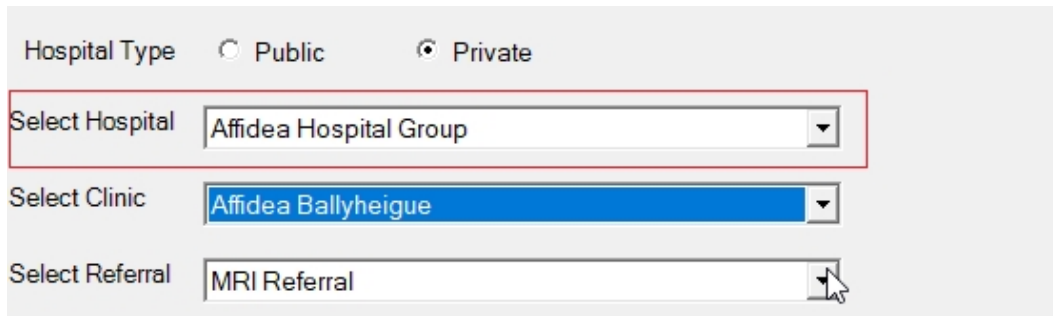

You can now search for a patient by entering the Eircode into the Address Field on the Patient Search.

### 3 Consultation

#### 3.1 Healthlink Hospital Referrals

Hospital groups added to the Hospital dropdown list on e-Referrals and Radiology Orders. If a group has more than one hospital, then a Clinic dropdown list will be displayed to show the clinics available for that group.

The screenshot shows a form with the following elements:

- Hospital Type:** Radio buttons for  Public and  Private.
- Select Hospital:** A dropdown menu with "Affidea Hospital Group" selected. This field is highlighted with a red border.
- Select Clinic:** A dropdown menu with "Affidea Ballyheigue" selected.
- Select Referral:** A dropdown menu with "MRI Referral" selected.

#### 3.2 Baseline Details Preference

New Practice option added for any practice who do not want the following fields to populate on a new baseline detail added for a patient (either manually by a user in the practice or from device uploads). Contact Support to enable this option.

- Smoker Status
- Smoke per day
- Ex-Smoker (Years)
- Drinker Status
- Weekly Alcohol
