[Tackling NCDs: 'Best Buys' and other recommended interventions for the prevention and control of noncommunicable diseases](#)

This document provides policymakers with a list of 'best buys' and other recommended interventions to address noncommunicable diseases (NCDs) based on an update of Appendix 3 of the Global Action Plan for the Prevention and Control of NCDs 2013-2020.

Objective 3: Reducing modifiable risk factors for noncommunicable disease and underlying social determinants through creation of health-promoting environments.

Other recommended interventions from WHO guidance (cost-evaluation analysis not available): implement whole-of-school programme that includes quality physical education, availability of adequate facilities and programmes to support physical activity for children.
