

### 3.2 The Sustainability Policy

With the Sustainability Policy, A2A has set itself the aim of **helping the communities in which it operates to be more sustainable**, through the responsible management of its activities.

In actual fact, the Policy is based on 4 pillars that are crucial to A2A's business and consistent with the international approach given by the UN through the SDGs: Circular economy, Decarbonisation, Smartness in networks and services and People Innovation.

For each of these pillars, A2A has defined not only the approach but also the objectives through to 2030, with a view to making a concrete commitment towards achieving the SDGs.
