

Historical Significance: The St Kitts Scenic Railway tour is a narrow gauge railway that was originally built in the early 20th century to transport sugarcane from the island's plantation to the sugar factory.

Scenic Route: The train follows a 30-mile circular radius around the island providing passengers with picturesque villages, stunning views of lush rainforests, views of urban and rural areas, lush landscaping of farming, and the different livestock that seem to freely roam the island.

Double decks: The train provides two levels. The upper-level has open-air seating and the bottom with air-conditioning. Passengers have the opportunity to sit inside or enjoy the fresh air and panoramic views from the top deck

Onboard Hospitality: Enjoy daiquiris and fruit punches as you take this historical journey. Listen to live Caribbean music and informative narration about the island's history and landmarks.

Rail & Bus: Combining both rail and bus allows a unique experience
