Digital Exchange is a managed service provider of technology since 1995. Adopting a consultative approach with every client, identifying the barriers impeding their progress, our aim is to fine tune our client's organisation, through embracing the digital era; Hosted voice services, access to cloud computing and off site back & recovery are just a few areas of our specialism. Supporting our clients in achieving their **digitisation** strategies results in increased efficiency, productivity and bottom line improvement.

Other services we can consult on, quote for and deliver include:

- Voice and data network cabling - design, implementation and certification.
- IT support - on-site and remote.
- IT solutions - networking design, supply & implementation of server & desktop environments (hardware & software).
- IT security backup and disaster recovery.
- Microsoft 365.
- Hosted phone systems (VoIP) & support.
- On-premise phone system & support.
- Digital dictation systems & support.

Contact us for free advice, and to discuss your organisation's requirements if starting up or relocating.
