TAKING ACTION TOGETHER

Against the backdrop of the climate emergency, we work with our customers to drive lasting change while **helping everyone hit their own sustainability targets.**

SEGRO is targeting an 81% reduction in corporate and customer emissions intensity and a 58% reduction in the embodied emissions intensity of our developments by 2034. We intend to be net-zero carbon by 2050.

This will be achieved through low-carbon development design, increasing the use of low-carbon building materials, efficient electrical heating systems, and 100% zero-carbon electricity in our properties.

We are dedicated to constructing highly efficient, low-carbon warehouse space that's tailored to your specific operational needs.
