Sustainability

Our Trade City and Logistics City concepts have evolved to be market leading in terms of environmental credentials, ensuring our developments, and the materials used, are sustainable.

From the initial design through to the final completion, our units are built with sustainable materials and energy efficient features, ensuring a lower environmental impact as well as reduced end-costs for the user. Using recycled and low-carbon materials wherever possible.

Built to Net Zero Carbon Standards

Target BREEAM rating Excellent

Solar PV cells

Air-source heat pump

High efficiency LED lighting

Grade A offices with green roof

Cycle storage

Electric vehicle charging

Target EPC Rating of A+

Highly efficient building, reducing costs

Sustainably sourced construction materials

Electric vehicle charging

Built for efficiency

Reducing environmental impact

Image: Trade City Luton

An architectural rendering of a modern, two-story office building with a dark grey, horizontally-ribbed facade and large glass windows. The building is surrounded by a landscaped courtyard with green lawns, several young trees, and wooden picnic tables. People are shown walking on a paved path and sitting at the tables, suggesting a focus on employee well-being and outdoor space. A parking lot with several cars is visible to the right of the building. The sky is blue with some light clouds.

Prioritising well-being

Logistics City Basingstoke

Kier Property in joint venture with Investec completed the development of Logistics City Basingstoke in April 2019. The scheme consisted of 109,235 sqft across three industrial units on a five-acre site.

Basingstoke is a dominant south east industrial centre benefiting from exceptional transport links via road, rail and air. Situated within one of the town's most recognised industrial/warehouse areas, close to (J6) M3.

A former office and distribution warehouse Kier Property let Unit A to Network Rail and Unit B to Oxoid Limited, who trade as Thermofisher. Both units were then sold to a private US Fund.

Tri-Link 140, Normanton

Kier's scheme provided an excellent industrial and warehouse opportunity, comprised of 142,338 sq ft facility incorporating 136,231 sq ft warehouse and 6,107 sq ft of office space.

Located in Wakefield, Europort is an established location at J31 of the M62. Tri-Link 140 is regarded as a flagship industrial and warehouse development that offered high quality buildings in a highly accessible and strategic motorway location.

The location benefited from the European rail freight access through the Europort freight terminal and has ready access to the deep water ports of Goole and Hull and five international airports within a one hour's drive.
