Description

Bestwood Business Park is a freehold, multi-let industrial estate, offering a mix of industrial units, ancillary offices and secure open storage. The estate has been developed in phases, with buildings primarily of steel truss frame construction and a combination of brick and steel-clad elevations. Units are finished to a traditional industrial specification, including three-phase power, roller shutter doors, WCs, yard areas and dedicated parking, with the wider site being fully surfaced, fenced and gated.

The principal warehouse buildings range in size from 1,000 sq ft to 34,000 sq ft, with some of the units combining to create larger overall demises catering to a broad range of SME occupiers.

The remainder of the site comprises approximately 4 acres of secure, surfaced and fenced open storage compounds currently let to a range of regional logistics, recycling and storage operators.

Asset Management & Alternative Use

Active Asset Management Opportunities

- Capture of contractual fixed rental uplifts across multiple lease events through to 2028.
- Letting of the two existing voids at Units 5E (B) and 5H(A), reflecting an aggregate ERV of c. £16,500 per annum.
- Re-gearing of leases with imminent expiries / breaks in 2026 and 2027 to capture rental reversion towards the headline ERV of £1,000,760 per annum.
- Refurbishment and / or sub-division of larger units to drive rental tone and diversify the income.
- Continued rental growth across the IOS / open storage element, where rental tones in the wider East Midlands continue to evidence material growth.
- Long-term break-up sales of individual units to owner-occupiers.

Projected Yield Performance

'Assumptions: contracted fixed rental uplifts applied; Rent reviews held flat; tenants assumed to renew at lease expiry at the higher of passing rent or ERV (no void)'

Alternative Use

Bestwood Business Park benefits from a lapsed planning consent for residential redevelopment of 220 homes (including a 7.5% provision for affordable housing). The local planning authority remains, in principle, supportive of residential redevelopment of the site and is currently progressing its emerging Local Plan.

There is also potential scope for a future temporary planning consent for an extended open storage, which could form part of an interim asset management strategy ahead of any wider redevelopment.

(All prospective purchasers to make their own enquiries with the local authority)

Occupational Market

In Nottingham, rents for smaller industrial units have continued to grow, with good refurbished space achieving c. £10 per sq ft and good secondary space now reaching £7–£8 per sq ft on well-located estates. Demand for open storage is also particularly strong, driven by logistics, recycling and trade occupiers seeking secure, serviced sites.

This combination of constrained supply and diverse occupier demand continues to underpin rental growth and support long-term occupational stability.
