TRANSFORMING TOMORROW

Berkeley
Designed for Life

01. OUR VISION

Our vision is to be East London's most progressive riverside community, motivating people to be more sustainable and inspiring them to appreciate and nurture the natural landscape they live in.

Highlights

Computer generated image of Phase 1 and Park

2,900 high
quality homes

35% affordable
housing provision

2.5 acre
riverside park

10,000 sq ft urban
community square

Community hub
to be delivered in 2026

Secondary school
safeguarded into
the Masterplan

02

HERON WHARF

The Past

The Limmo Peninsula, Goodluck Hope/Leamouth Peninsula, 1951

The Past

River Lea, South Bromley, 1951

1823

Riverside marshland site bought by Macintosh Family and turned into Market Gardens and family farmhouse.

1864-65

Series of terraced streets were built by Macintosh to create Aberfeldy. The Scottish street names span the alphabet from Ailsa and Aberfeldy to Zetland, and reflect Macintosh’s Scottish background.

1878

Poplar Gasworks established by reclaiming marshland using excavated soil from East India Docks. Gas was both produced and stored on the site which contained three retort houses and three gasholders.

World Wars

Aberfeldy Estate was badly hit by German bombers. Extensive bombing in Poplar led to significant replanning and numerous new buildings among the original Victorian streets.

1950s

Technological improvements in the storage of gas resulted in the gasholders being made redundant, providing the opportunity for the site to be redeveloped.

2010s

Part of the site was remediated and the gasholders were removed. Berkeley has retained three vertical and two horizontal sections of Gasholder 1 so that it can be refurbished and used in the future public realm.

REVISED PHASE 2 & 3 PROPOSALS

The 2019 Hybrid Permission for the next phases of the site (Phase 2 and 3) have been enhanced. Some key changes:

- 2,900 mixed-tenure homes including:
 - More dual aspect homes (+19%)
 - More homes with view of a river or green space (+28%)
- New core designs to accommodate a second staircase in each building, in line with emerging building regulations
- Provision of more quality, usable open space from 7% to 16% (+9%)
- Connectivity within the site and wider connections; further design integration of the future bridge landings

HOMES FOR ALL

		Private Housing	Affordable Housing	Total Homes
Completed	Phase 1	332	219	551
Under construction	Phase 1	92	-	92
Future completions	Phase 2	766	223	989
	Phase 3	699	246	945
	Phase 4	245	78	323
Total		2134	766	2900

Site Plan of Heron Wharf proposed masterplan.

Approach to Landscaping

THE LOWER LEA VALLEY CORRIDOR

The development site's position between the Aberfeldy Estate and the River Lea has influenced the landscape design.

To the south, closest to the existing house estate, landscaping is more formal and garden-like. In contrast, the northern part of the site is more organic, inspired by the site's natural wetland heritage, and proximity to the River Lea Valley.

This part of the site will harness the river's edge as a resource for both recreational activities and improved biodiversity, through which the community will benefit from a renewed connection to the surrounding landscape.

The Lea Valley is a London Wildlife Trust's 'Living Landscape'. London's 'Living Landscapes' are rich in wildlife, highly valued and accessible to people. They provide opportunities for learning and enhance wellbeing. What is good for wildlife is good for people too!

Berkeley has worked with the London Wildlife Trust and LDA Landscape Design to produce a Landscape Ecology Management Plan. This sets out the biodiversity strategy, ecological features and management of the landscape on a site-wide basis.

Delivery of the Park Masterplan

Park Phase A of Heron Wharf Masterplan

PARK PHASE A DETAILED PROPOSALS:

Reserved Matters planning consent for Phase A of the park was secured in May 2024.

A detailed design has been developed, which includes the following features:

- Open green space including lawn and large areas of open mosaic habitat
- Gasholder guideframe retained and installed on a new raised platform
- Terraced seating and signage installed at the base of the gasholder guideframe to create a social space

Key features of Park Phase A:

- Inclusion of the retained gasholder guideframe located on a new raised platform within the park
- A new activated social space at the base of the gasholder guideframe, with information boards and terraced seating
- Amenity lawn for a variety of uses with high quality seasonal landscaping
- Creation of large areas of open mosaic habitat

Community and Social Value

SHE BUILDS UK

SHE BUILDS UK

Berkeley and She Builds UK partnered to host an exhibition at Heron Wharf that shines a light on women working in the construction industry.

Neil Perry, founder of She Builds UK, was inspired to launch the campaign when his 7-year-old daughter explained that she thought only men could work in construction. Neil sought to highlight more of the women working in the industry by exhibiting simple portraits alongside a career profile.

The exhibition was hosted in Heron Wharf's newly completed commercial unit, free of charge.

A series of school visits were held which consisted of a half-day workshop for the students to participate in a building activity, site tour and speak with the teams on site about their work, careers path and experiences.

A number of children returned to the exhibition with their parents with many enquiring about Berkeley's apprenticeship programme.

THE LINE

The Line is East London's public art trail. Connecting three boroughs (Newham, Tower Hamlets and Greenwich). Following the Greenwich Meridian, it runs between the Queen Elizabeth Olympic Park and The O2 on Greenwich Peninsula.

Berkeley supported The Line for a 'Nature in Mind' art installation on the existing Cody Dock Cable Bridge. The bridge lands on the north-western corner of our site and connects with Newham. The Installation is by the late artist Madge Gill, whose brightly coloured, patterned work attracts visitors along the towpath that runs along the River Lea to the north of our site.

The 'Nature in Mind' installation was installed in 2021.

Our Vision 2030

TRANSFORMING TOMORROW

At Berkeley Group our passion and purpose is to build quality homes, strengthen communities and improve people's lives. We are innovating, pushing boundaries and taking action to secure we have a long-term, positive impact that is good for our customers, the communities we touch, our business and the world around us.

We transform underused sites into exceptional places and we're also transforming the way we work; embracing technology and raising standards, as we continue to deliver an outstanding customer experience and create high quality homes that delight our customers.

Our Vision 2030 is our ten year plan which sets out how we will achieve this.

TRANSFORMING PLACES

Working with local people and partners we create welcoming and connected neighbourhoods where you can be proud to live.

TRANSFORMING LIFESTYLES

Taking action on climate change and giving you ways to live more sustainably. We're building efficient homes that use less energy over their lifetime, with sustainable travel choices on the doorstep.

TRANSFORMING NATURE

Creating beautiful places with habitats that help nature to thrive, meaning that every site is left with more nature than when we began.

TRANSFORMING FUTURES

Helping people to reach their potential through apprenticeships and training, and programmes supported by the Berkeley Foundation.
