Generator View from Newmarket Road

Generator sits within the journey portfolio - a property company focused on delivering flexible and fitted spaces in the UK's key knowledge economies. This allows our customers to focus on growing their core business rather than tying up capital and energy in real estate strategy.

The operational portfolio will include lab, incubator, R&D, workspace, event space and supporting amenities including residences. The goal is to create unique spaces for our customers and to promote well-being and ESG.

The platform will be connected by a digital interface providing communication, clubs, and events to create a member community.

journey has an experienced management team that understands the importance of listening and reacting to customer requirements. This is especially important for fast growing companies that have dynamic and evolving space requirements.
