

# ULTRASONIC CLEANING SYSTEM 25

Version 18-10-2022

## 25 Litre Ultrasonic Cleaning System

Robust and reliable, delivering effective cleaning results for all manufacturing, processing and maintenance applications. Multiple parts can be processed in one cycle.

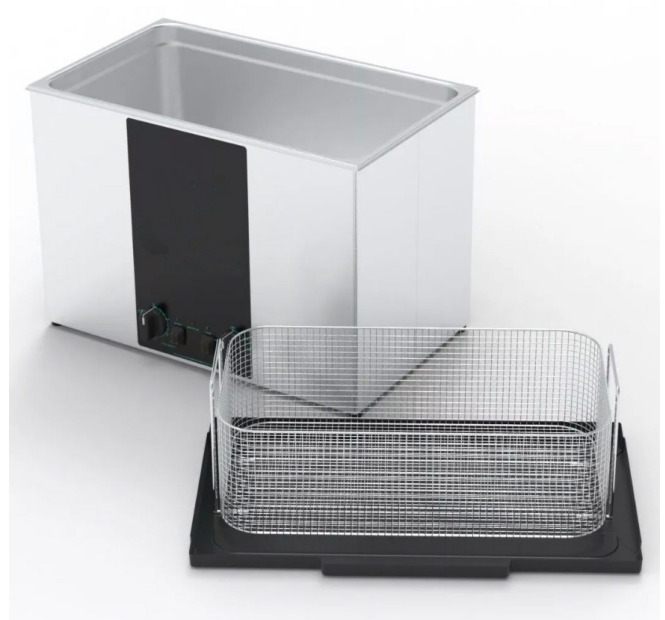

The improved cleaning results reduce the need for re-cleans or rejects, whilst the simple one-button-press operation allows the operator to process other tasks during the cleaning cycle.

Simply fill the tank with water, turn the dial to the required minutes and press the Sonics button to begin cleaning. This ultrasonic bath has a 25 litre working capacity and an analogue timer control of up to 15 minutes and a maximum heating temperature of 70°C.

Supplied complete with a stainless steel basket and a plastic lid which acts as a drip tray when the basket is removed from the tank.

Using aqueous solutions, the system cleans with minimal environmental impact or health and safety requirements. The lid acts as an insulator, minimising evaporation thus lowering heating requirements, water and detergent usage.

Features a stainless steel tank to maximise the longevity of the unit. The stainless steel basket shelf further minimises wear whilst parts are positioned to ensure maximum exposure to ultrasonic cleaning activity.

# ULTRASONIC CLEANING SYSTEM 25

Version 18-10-2022

## Product Data

General Information	
Overall Dimensions	550 x 345 x 365 mm (WxDxH)
Internal Tank Dimensions	500 x 300 x 200 mm (WxDxH)
Basket Dimensions	470 x 265 x 130 mm (WxDxH)
Tank Capacity	28 Litres
Working Capacity	25 Litres
Construction	304 Stainless Steel
Control	Analogue Control (Timer and Temperature)
Timer	0 to 15 minutes
Temperature	Ambient to 70 °C
Operating Features	Drain Valve Heated
Ultrasonic Power	400 W
Heating Power	650 W
Operating Frequency	32 - 38 KHz
Mains Connection	230 VAC
Net Weight	17 kgs
