

## Fulfillment Methods

# Amazon SageMaker

Usage Instructions: The abusive comment detection can be invoked via the /invocations endpoint.

It accepts JSON data with the following format:

Input (application/json): Text

Payload:

```
{  
  "Value": ["sample text goes here"]  
}
```

Output (application/json):

```
[0.0393042341,0.0001401903,0.0039898045,0.0001401451,0.0046952446,0.0002511063]
```

The output gives the probability of the abusive content based on 6 categories.

1. Toxic - level normal
2. Toxic - level high
3. Obscene
4. Threat
5. Insult
6. Identity Hate
