This Table contains the Interest of £100 for all the several days in the first column, and at the several rates of 3, 3½, 4, and 5 p cent. in the other four columns.

To find the Interest of £100 for any other time, as 1 year and 250 days, at 3½ p cent., take the sums for the several days as they are stated.

For other sums than £100.—Ex. £312 10s. at 3½ p cent. for the above time.

First find for £100, as above—multiply the interest by the number of hundreds, and for the odd sum take the parts of the hundred, and add to it.

Inter. for 1 year £3 10 0
..... 200 days.. 1 18 4
..... 50 days.. 0 9 7

Interest required 5 17 11½

One eighth of £100
for £12 10s. ... 0 14 8½

18 8 6½

When the Interest is required for any other rate than those in the table, it may be easily made out from them. So ½ of 5 is 2½, of 4 is 2, of 3 is 1½, 1.3rd of 3 is 1, 1.6th of 3 is ½, and 4.12th of 3 is ½; so, by parts, or adding or subtracting, any rate for any amount may be found.

A CONCISE READY RECKONER.

By the Pound, Yard, Stone, &c.

To know the price of articles purchased at pence only, multiply the number of pounds, yards, &c. by the price, and divide by 12, which gives the amount in shillings; for three halfpence divide by 8, the answer is shillings.
