

ARIS EDUCATION PACKAGE – PROCESS DESIGN & ANALYSIS

Installation Guide

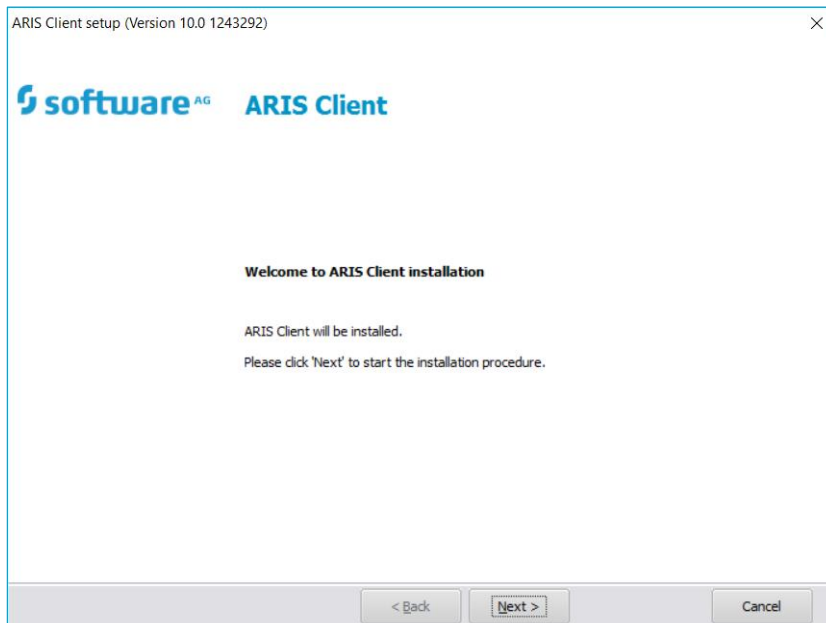

Version 3.0 | January, 2019

TABLE OF CONTENTS

1. Client Installation	3
2. Restore Exercise Databases	5

1. Client Installation

- 1) Start the ARIS Client Installation as Administrator and click on **Next**

- 2) Confirm The License Agreement and click on **Next**
- 3) Select a folder Where you would like to install ARIS
- 4) Click on **Next**
- 5) Check **ARIS Architect/Designer and ARIS Administration Tools**
- 6) Click on **Next**
- 7) Select the radio button: ARIS with local standard-database (Important)

Kindly read the following information carefully before continuing with the installation.

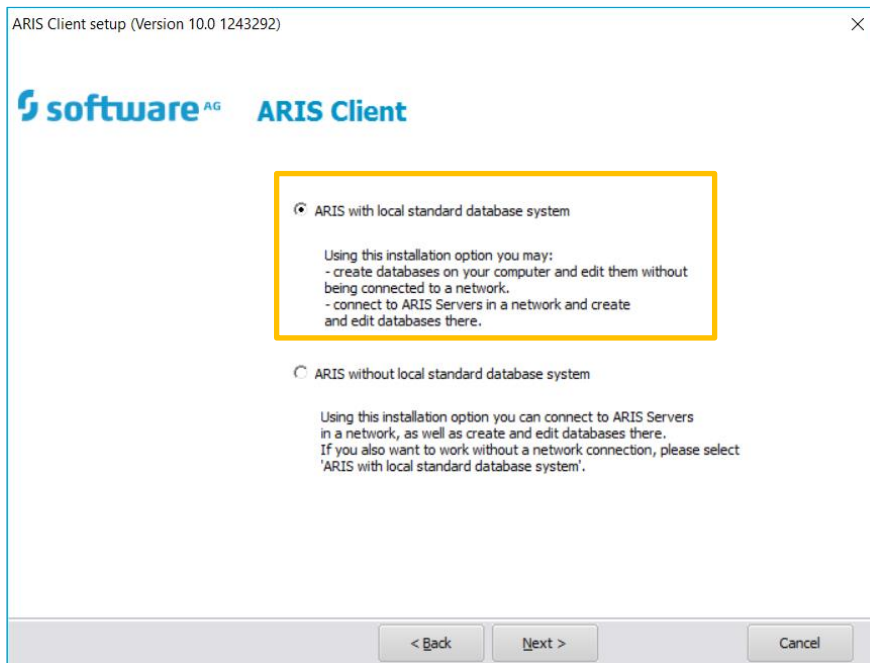

****What is local server / local database?**

Without local server/database:

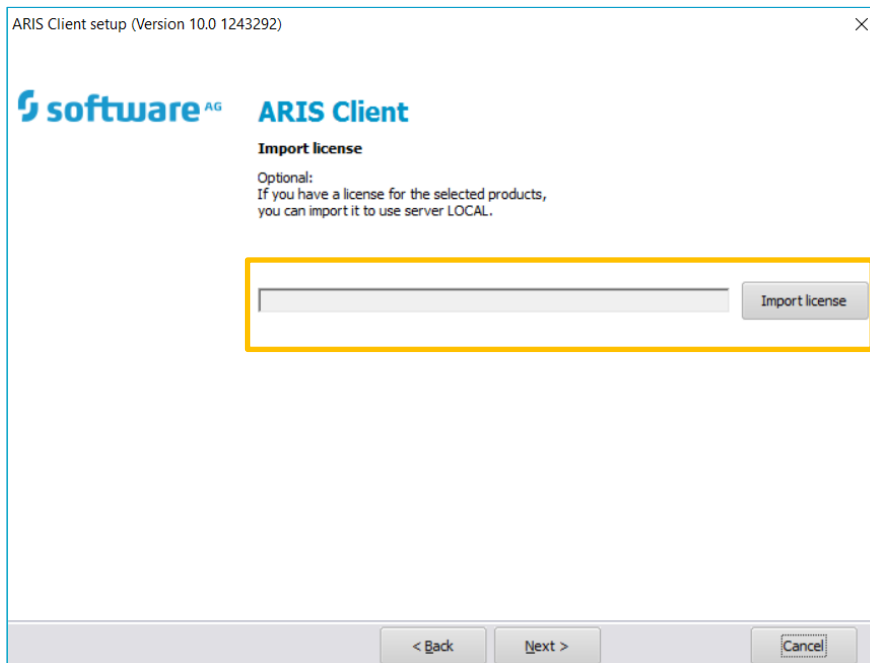

An installation without a local database is usually needed in a multi-user scenario, e.g. if you want to use ARIS as a part of an university course. In this case, ARIS Design Server has to be previously installed in the university's network. The ARIS Design Server hosts the database where all models are stored; the users (e.g. students) install the client on their machine without a local database and then connect to that server.

With local standard server/database:

An installation with a local database is needed in a single-user scenario, i.e. if you want to use ARIS for an individual matter (working paper, project, thesis, just playing around etc.) and want to host your database by yourself on your local machine.

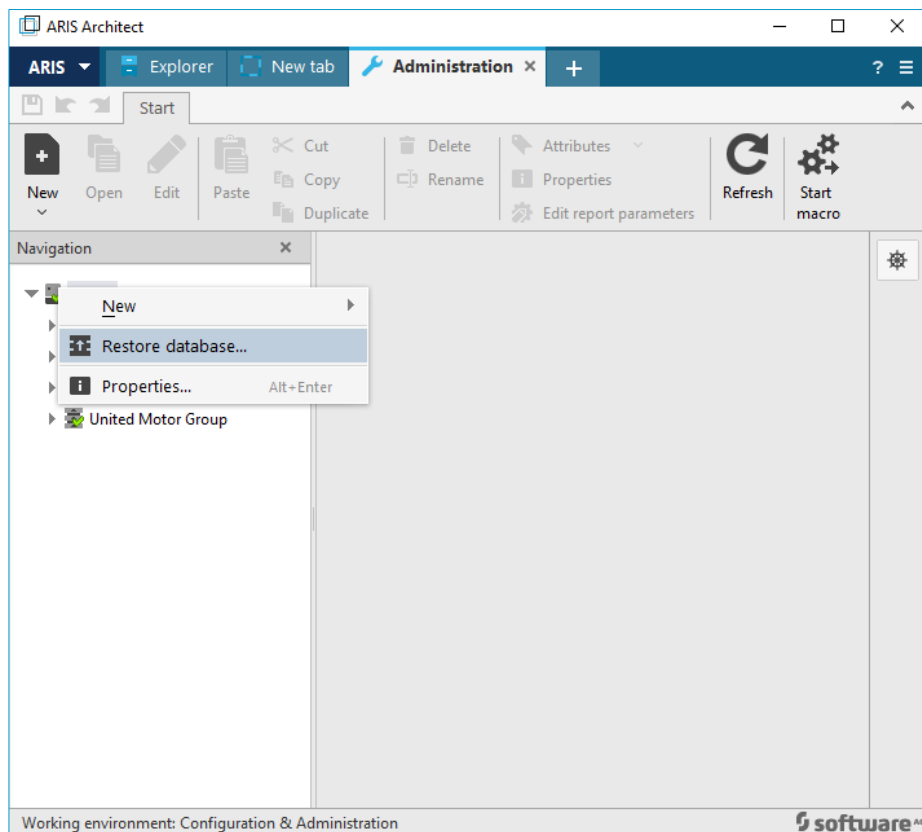

8) Insert your License and finish the Setup

2. Restore Exercise Databases

- 1) Start ARIS Architect
- 2) Connect to your local Server (User: system ; Password: manager)
- 3) Click on the ARIS Menu
- 4) Open the Administration tab
- 5) Right-Click on LOCAL server and select 'Restore database'

- 6) Select the Architect_1 database from the AEP PDA Materials
- 7) Click on Finish
- 8) Repeat the same procedure with the Architect_2, Architect_3 and United Motor Group database

ABOUT SOFTWARE AG

Software AG offers the world's first Digital Business Platform. Recognized as a leader by the industry's top analyst firms, Software AG helps you combine existing systems on premises and in the cloud into a single platform to optimize your business and delight your customers. With Software AG, you can rapidly build and deploy Digital Business Applications to exploit real-time market opportunities. Get maximum value from big data, make better decisions with streaming analytics, achieve more with the Internet of Things, and respond faster to shifting regulations and threats with intelligent governance, risk and compliance. The world's top brands trust Software AG to help them rapidly innovate, differentiate and win in the digital world. Learn more at www.SoftwareAG.com.
