

What will happen to the information I give you?

Your personal details will be held confidentially in accordance with the Data Protection Act. They would only be used as set out on the front page of the **Before your operation** questionnaire. Your details will be used to send you an **After your operation** questionnaire.

Why are other organisations used to help with the programme?

Contractors working on behalf of Aspen Healthcare help to handle, process and analyse the information you give. Only organisations with a track record of expertise in these areas have been chosen to support the collection and reporting of Patient Reported Outcome Measures.

Will my personal details be safe?

Published reports will not contain any personal details. The handling and storage of personal information will be undertaken to the very highest standards.

THANK YOU FOR YOUR HELP

Patient Reported Outcome Measures

What are Patient Reported Outcome Measures?

Patient Reported Outcome Measures, sometimes called 'PROMs', are questionnaires that ask patients about their health before and after an operation. They help to measure the results or outcome of the operation from the patient's point of view.

All patients who are undergoing hip replacement; knee replacement; groin hernia surgery, carpal tunnel or cataract surgery are being invited to complete these PROM's questionnaires.

They are also being collected for a range of Cosmetic procedures.

The purpose of the questionnaire is to collect information about the quality of healthcare services. The information collected will be used to produce statistics about the quality of healthcare services offered by different healthcare providers.

These statistics will be used to measure and improve the quality of healthcare services

Why are we doing this?

We want to improve the quality of healthcare services wherever we can – and it's crucial to ask patients what they think. Patient Reported Outcome Measures will

help us improve still further the quality of services for patients, by taking into account patients' views of quality, and will help our hospitals and clinics reach the very best standards of care.

What happens next?

You will be asked to fill in a short **Before your operation** questionnaire when you come into our hospital/clinic. You should read the information on the front cover (paper version) **or** the information on the front page of the electronic version and if you wish to, fill in the questionnaire with your answers. Once you have completed the questionnaire please hand it back to the person who gave it you **or** press send on your computer.

In a few months' time you will be sent an **After your operation** questionnaire through the post **or** electronically (dependent on how you completed your original questionnaire) to fill in and return. Once you have filled in the questionnaire with your answers please post it back to us in the enclosed envelope. This is free- post and does not require a stamp **or** press send. **NB – this may appear in your "spam" folder.**

Do I have to take part?

Your help would be greatly appreciated, but it is not compulsory. If you do not wish

to take part, do not complete the questionnaire.

Do I have to give my consent to participate?

With your permission, the personal details that you provide will be used to analyse and interpret the information collected. By completing the **Before your operation questionnaire** you are giving your consent for your data to be used in this way. There is a statement on the front of the questionnaire (hard copy) **or** front pages of the electronic questionnaire that you will be given which tells you exactly what you are giving your consent for and how the data will be used.

Your personal information will be handled securely and it will be anonymised after analysis and before any publication. Your personal information will not be released unless required by law or where there is a clear overriding public interest.

Can I change my mind?

Yes, up to the point where the data is analysed and personal details removed. Withdrawing your information will not affect your medical or legal rights in any way. You can do so by contacting Howard Warwick Associates (HWA) by any of the contact methods shown overleaf.
