## About Claremont Private Hospital

Claremont Private Hospital was set up by the Sisters of Our Lady of Mercy, a religious institute located in Ireland in 1831, moving to Sheffield in 1883. The original hospital was opened in 1921 and was situated close to the city centre on Claremont Place, a site where the Royal Hallamshire Hospital now stands. In 1953, Claremont Private Hospital moved to its present location at Crosspool, South West Sheffield.

Today, now part of the Aspen Healthcare Group, we are a successful private hospital encompassing most medical specialties as well as diagnostic imaging, physiotherapy and pharmacy. We work hard to protect our reputation for excellence and enjoy local relationships with both patients and companies alike, providing all manner of healthcare services.

## Ophthalmology Services

2019

# Ophthalmology Services at Claremont Private Hospital

# Our Consultant Ophthalmologists

Although we can function without our sight, we rely heavily on vision to live our everyday lives. The eye is one of the most complex organs in our bodies, which is no surprise when you understand the challenges in providing vision.

At Claremont our specialist Consultant Ophthalmologists offer a comprehensive service for the assessment, diagnosis and treatment of eye and vision concerns. Patients can be seen by one of our Ophthalmologists within a few days once a referral has been received from an Optometrist or GP.

Should further treatment be required, we offer a range of anaesthetic options including local, general or eye drops. There is little or no waiting time for surgery and treatment can start as soon as the patient is ready.

Ophthalmology integrates with many other branches of medicine. The commonest cause of visual impairment under the age of 65 years is diabetes, and at Claremont Private Hospital our Consultants have access to other specialists within the hospital to work with and refer to as appropriate.

We offer diagnosis through to treatment for a variety of eye conditions including:

- Cataract surgery
- Oculoplastics
- Oculofacial rejuvenation
- Tear duct drainage
- Diabetic retinopathy
- Glaucoma
- Macular degeneration
- Orthoptics
- Vitreo retinal disease

Private patients benefit from access to collaborative care and facilities with the latest technology. Our approach is designed to be convenient for people who lead busy lives and who have limited time to seek medical advice and treatment.

Our Consultant Ophthalmologists hold substantive posts in the NHS and aim to deliver a high quality private service within the calming, unique and quality clinical environment at Claremont Private Hospital.
