PROJECT INFO

Fencing Type: AMX-T24

Installation: Below Ground

Longevity: Temporary

Species: California Tiger Salamander

Client: California High Speed Rail Authority

Location: California, USA

SUMMARY

Environmental teams working on the California High Speed Rail had found plastic mesh fencing used on early stages was not withstanding the demands of the project and required frequent replacement and maintenance. To avoid delays and reduce ongoing costs biologists teamed with engineers, contractors and the High Speed Rail Authority to utilize Animex for its high durability, low cost and animal-safe technology. Our team provided training and advice to contractors for quick, effective and low-impact installation. Moving forward, Animex's durability and reusability will dramatically reduce ongoing costs and prevent dumping of short-term plastic mesh materials in the landfill.

Challenges

- Remote locations
- Short install window
- Sensitive area

Actions

- Low impact
- Durable materials
- Installation support

Outcomes

- Low cost
- Low maintenance
- Quick installation
