PROJECT INFO

Fencing Type: AMX-P30

Installation: Above Ground

Longevity: Permanent

Species: Reptiles & Amphibians

Client: Ontario Parks

Location: Presqu'ile Provincial
Park, Ontario

SUMMARY

We supplied permanent multi species exclusion fencing for Ontario Parks that was installed along a roadside in Presqu'ile Provincial Park, Ontario, targeting Snapping Turtles and other reptile and amphibian species. The installation method involved the bottom lip being placed on top of the ground and then covered with earth and gravel. This installation technique was very swift and effective, allowing the fencing to be in place to help reduce roadkill as quickly as possible. The fencing on both sides of the road was connected to a wildlife crossing culvert that will allow animals to safely travel between these two areas of their habitat.

Challenges

- Retrofitted to tunnels
- Snow loading
- Uneven terrain

Actions

- Quick installation
- Installation support
- One-way escapes

Outcomes

- Lower mortality
- Habitat connectivity
- Low maintenance
