

'What's new in CF treatments?'

An interactive session for People with CF, Parents and Carers

Saturday 7th July, 10am-1pm

Heartlands Education Centre, Birmingham Heartlands Hospital, B9 5SS

- Do you have CF or know someone with CF?
- Would you like to know more about the new treatments being developed to treat CF?
- Are you confused by the information that is currently available and want things explained in a more straight-forward way?
- Would you like to ask questions and have them answered in real time?
- If so, please consider taking part in the meeting

There are 2 ways to take part – either attending in person or via the internet. If you have CF, you will need to take part via the internet to prevent cross-infection. If you don't have CF, you are welcome to attend in person or else take part via the internet.

Attending in person – this is an interactive session, so please feel free to ask questions at any time. There will be a break for tea/ coffee and refreshments and lunch will be provided - we will be sending out details of how to register in the near future so that we can provide catering accordingly.

Taking part via the internet – we will provide a link to paste into your browser nearer the time. There will be plenty of opportunity for those taking part via the internet to ask questions and have your questions answered in real time if you wish.

Talks will be given by Dr Edward Nash and Dr Maya Desai, as well as an adult with CF and members of both adult and paediatric CF multi-disciplinary teams

Please contact Elaine Chapman or Jo Osmond if you have any questions about the event on elaine.chapman@heartofengland.nhs.uk tel:0121 424 2261 or j.osmond@nhs.net
