

TUBE CHAIR

DESIGN BY

Jesse Visser

DESCRIPTION

The synthesis between production technique and materials results in a minimalistic design with pure detailing. This exclusive, stackable and lightweight chair is constructed from aluminum with an added Fenix nanotech matt material seat and backrest is suitable for residential, office, hospitality and retail use.

MATERIALS

seat top: Fenix NTM

base: coated aluminum

CLEANING INSTRUCTIONS

Fenix NTM:

Fenix NTM surface should be cleaned regularly but does not require any special maintenance, just a damp cloth with warm water or mild detergents. Almost all normal household cleaning products or disinfectants are perfectly well tolerated. When needed, it is suggested to use the magic sponge for cleaning the surface.

coated aluminum:

Dust with a soft, dry cloth or clean with soapy water. Can be moistured slightly with spiritus. Treat once a year with acidfree vaseline.

NOTE

"Create your own" and download at our 3D configurator.
