WHo We Are.

CPMG is an award-winning firm providing services in architecture and interior design.

Since 1997 we have been growing our reputation for designing award winning buildings and spaces that meet our clients’ needs and that are also delightful places to be, we continue to grow and we have no intention of stopping. Fast forward to now and we offer over 20 years of cross sector experience from our headquarters in Nottingham and offices in Birmingham, London and China.

We are designing buildings across the UK and around the world, focusing our designs around human needs: supporting growing communities, building homes and workplaces, producing sustainable solutions, harnessing new technologies, and cultivating health and well-being.

We’re innovative, approachable and creative people.

We believe in designing places that meet our clients’ needs and ensure all our designs are crafted for the people, the purpose and the place. That is our mission.
We work closely with our clients to create buildings that hold true meaning and purpose. By employing a people-first approach we are able to go beyond the expected, building relationships that last long after a project is complete.

We are responsible for the first PassivHaus accredited operationally carbon negative commercial office in the UK, thanks to our team of expert problem solvers.

Delivering our architecture with a people-first approach

Our architecture is a considered blend of beauty, practicality & meaning

Our philosophy is to design buildings that not only meet clients’ needs, but are also delightful places to be. For more than 20 years, we’ve been producing award-winning buildings that have exceeded clients’ expectations, time and time again.

With each and every building we design, we endeavour to instil an imaginative yet pragmatic approach that recognises budget and programme constraints. Central to our design approach is a sustainable, cohesive and legible concept which results in building designs that meet changing needs and are easy and enjoyable to use, - ‘places that feel better’.

Architectural services

INTERIOR DESIGN AT CPMG

We believe interior design is the skilful expression of function, aesthetics & identity

Our design philosophy focuses on the creative synthesis of culture and vision, space and wellbeing. We believe that interior design should be sensitive to the quality and integrity of its architecture.

We listen to our clients to understand their culture, identity and their aspirations for change and improvement. Our cross sector experienced interior design team provides an innovative approach, pushing boundaries to achieve interior environments of originality and longevity, creating engaging spaces where people want to live, work, learn and relax.

We’re here to think creatively and make a difference.

You, your people and your brief are completely unique and our team of interior designers and space planners will work with you to create engaging and creative spaces.

Interior Design services

Bespoke Joinery  Workplace Strategy
Space Planning  Furniture Procurement
Finish Specifications  Space Analysis
Our [work]place consultancy starts by getting to know you your organisation, your aspirations, how you operate, and how all these elements influence your functional brief. Only then will we develop the design and with our integrated team of architects, interior designers and space planners to ensure that your space is a place where people feel good and achieve their best.

Our [work]place consultancy can help with wellbeing and productivity, these rely on much more than an efficient working environment; they rely on motivation too. It is imperative that we put people first: it’s all about you and your wellbeing, motivation and productivity.
The ability to quickly produce 3D snapshots of any internal space within the building has provided clients with an understanding of the qualities of rooms and key spaces. This would simply not be possible with 2D drawings. A major benefit of this has been the level of client feedback that can now be provided. We have been appointed to the BIM review panel of a major national contractor and are also providing BIM consultancy services to a regional contractor.

**BIM as a core design tool**

The ability to quickly produce 3D snapshots of any internal space within the building has provided clients with an understanding of the qualities of rooms and key spaces. This would simply not be possible with 2D drawings. A major benefit of this has been the level of client feedback that can now be provided. We have been appointed to the BIM review panel of a major national contractor and are also providing BIM consultancy services to a regional contractor.

**BIM (Building Information Modelling) at CPMG**

We are award-winning innovators in Revit® and have written bespoke software on behalf of clients to enhance its innate capabilities and apply it to a particular construction sector. Our deep understanding of the software allows us to utilise it across our entire design process.

Our experience in BIM has enabled us to be clear about our approach and the benefits it brings. We are registered by the British Standards Institution as compliant with BIM Level 2 Tier 1 Design Lead BS1192:2007, PAS1192-2:2013, BS1192-4:2014.

We use Navisworks Manage® to enable us to better navigate buildings and to develop a clearer understanding of how processes fit into the structure and coordinate with the building services. The Revit models are also used to allow stakeholders to ‘walk through’ the building to gain a greater understanding of spatial relationships.
