Increased

Minor flooding impacts are possible from Tuesday through to Friday. The overall flood risk is VERY LOW.

Specific Areas of Concern Map 1: Tuesday 6 November.

RISK AREA A

Impact **MINOR**

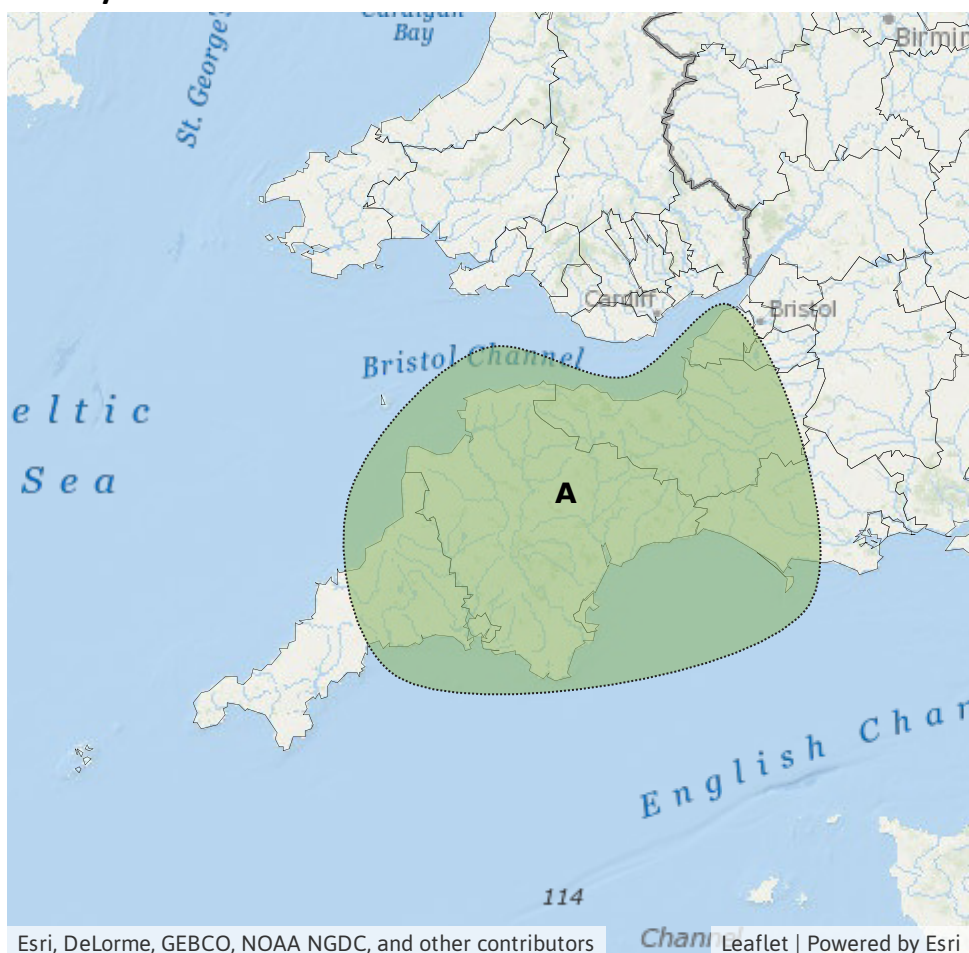

Likelihood **LOW**

Source River Surface

Likely duration 1 Day

Fallen leaves may hamper drainage and exacerbate flooding locally.

Flood Guidance Statement

10:30hrs Monday 05 November 2018

Areas of Concern Map 2: Wednesday 7 November.

RISK AREA **B**

Impact **MINOR**

Likelihood **LOW**

Likelihood

Impact

Source River Surface

Likely duration 1 Day

Fallen leaves may hamper drainage and exacerbate flooding locally.

The map displays the Bristol Channel and surrounding regions. A large green shaded area, labeled 'B', encompasses the Bristol Channel and extends onto the surrounding land. The map includes labels for Cardigan Bay, St. George's Channel, Bristol Channel, and English Channel. The map is powered by Esri, DeLorme, GEBCO, NOAA NGDC, and other contributors.

Assessment of flood risk

Surface water

The surface water flood risk is VERY LOW for the next five days.

Minor surface water flooding impacts are possible in parts of south-west England later on Tuesday and parts of south Wales and south-west England on Wednesday morning due to heavy rain. See Areas A and B in Specific Areas of Concern Maps 1 and 2.

Further minor surface water flooding impacts are possible in parts of south-west England and south Wales on Thursday due to heavy showers, and more widely across western and southern England and Wales on Friday evening from further widespread heavy rain.

Rivers

The river flood risk is VERY LOW for the next five days.

Minor river flooding impacts are possible but not expected in parts of south-west England later on Tuesday and parts of south Wales and south-west England on Wednesday due to heavy rain. See Areas A and B in Specific Areas of Concern Maps 1 and 2.

Minor river flooding impacts are also possible but not expected in parts of the west of England and Wales from Friday evening in response to further widespread heavy rain.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Minor coastal/tidal flooding impacts are possible but not expected along parts of the south coast of England during Tuesday afternoon and into Wednesday morning due to strong southerly winds and large waves coinciding with spring tides.

Groundwater

The groundwater flood risk is VERY LOW for the next five days.

Flood risk matrix

LIKELIHOOD	HIGH				
	MEDIUM				
	LOW				
	VERY LOW				
		MINIMAL	MINOR	SIGNIFICANT	SEVERE
IMPACT					
		VERY LOW	LOW	MEDIUM	HIGH
OVERALL FLOOD RISK					

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads
Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads
Flooding affecting individual properties
Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities
Possible danger to life and damage to buildings/structures
Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel
Widespread flooding affecting whole communities
Widespread disruption or loss of infrastructure
Large scale evacuation of properties possible
