

The overall flood risk is LOW for today (Wednesday) in parts of the east Midlands. Elsewhere, the flood risk is VERY LOW for the next five days.

Specific Areas of Concern Map 1 - Wednesday 16 October 2019.

Flood Guidance Statement

Assessment of flood risk

The river flood risk is LOW for today (Wednesday).

Following recent rain, river levels remain high across parts of the east Midlands, where localised minor impacts are expected today from river flooding. However, river levels are expected to decrease during today.

There are also high river levels over central-southern and eastern England but these are decreasing and no flood impacts are expected.

Surface water

The surface water flood risk is VERY LOW for the next five days despite heavy showers. Localised instances of surface water flooding may occur but any impacts are expected to be minimal.

Coastal/Tidal

The coastal/tidal flood risk is VERY LOW for the next five days.

Groundwater

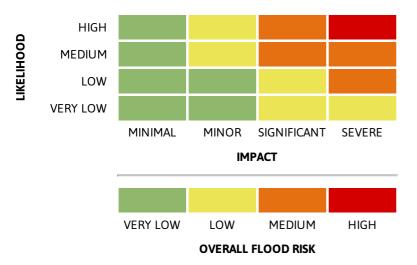

The groundwater flood risk is VERY LOW for the next five days.

Flood Guidance Statement

10:30hrs Wednesday 16 October 2019

Flood risk matrix

Summary of potential impacts

MINIMAL

Isolated and minor flooding of low-lying land and roads Isolated spray/wave on coastal promenades
Little or no disruption to travel, but wet road surfaces

MINOR

Localised flooding of land and roads Flooding affecting individual properties Disruption to travel and key sites in flood plans

SIGNIFICANT

Flooding affecting parts of communities Possible danger to life and damage to buildings/structures Disruption to travel and key sites in flood plans

SEVERE

Danger to life, severe disruption to travel Widespread flooding affecting whole communities Widespread disruption or loss of infrastructure Large scale evacuation of properties possible

Next statement due 10:30hrs Thursday 17 October 2019 (all times are local)
