

# TUBING ANCHOR CATCHER

The Oilenco Tubing Anchor Catcher has been designed to self anchor within any monobore completion.

The slickline set device can be installed anywhere within the monobore completion, to offer a temporary hang off point for operations such as gas lift valve change out to catching falling

debris. Simple latch and repositioning of the catcher is possible without the need to remove it from the well. Each tubing anchor is designed to suit all weights within each tubing range.

- Secure anchoring device
- Engineered to suit application requirements
- Simple set and retrieve locking system
- Installed and retrieved on standard GS
