

Nature Prints

Leaf Rubbings

Materials

- Coloured pencils or crayons
- Paper
- A selection of leaves - collect these from your garden, from house plants or on your daily walk.
- You could also see what other objects around your home have interesting textures to make rubbings from e.g. coins

Place a plain sheet of paper on top of your leaves and rub your pencil or crayon along the paper over each leaf. Watch your leaves come to life on the paper!

There are lots of different ways to experiment. Why don't you try blending different colours, pressing down slightly harder or softer with the pencil, or mixing crayons and coloured pencils together?

Share your creations with us on social media #wattsmakespace
A huge thank you to Jo Sapia for collaborating with us on this activity
