Suncatcher Drawings

Add some colour to your room by making suncatcher drawings to string up at your window.

Materials

- Felt tip markers
- Transparency sheets
- Hole punch
- Ribbon / string

- Using felt tip markers, draw a picture onto the transparency sheet. You can trace a picture or make up your own design.
- Trim around the edge of your design, if you want, leaving enough blank space at the top to punch a hole.
- Punch a hole at the top and thread the ribbon through.
- Hang it up at your window and enjoy watching the light shine through the colours!
