2016
WORLDWIDE DIRECTORY OF

Systems Engineering and Industrial Engineering Academic Programs

January 29, 2016

Dear Colleagues,

Last year, the International Council on Systems Engineering (INCOSE) and the Systems Engineering Research Center (SERC) at Stevens Institute of Technology jointly published the first edition of the Worldwide Directory of Systems Engineering and Industrial Engineering Academic Programs. Community reaction was very favorable, with many of our colleagues excited to see such a compendium for the first time. Their support and response via corrections and updates has prompted us to develop this second edition for 2016.

We hope you find this directory valuable. Please share it with your colleagues and please feel free to send any updates or corrections to: *ISEDirectory@stevens.edu*.

Sincerely,

INTERNATIONAL COUNCIL ON SYSTEMS ENGINEERING (INCOSE)

SYSTEMS ENGINEERING RESEARCH CENTER (SERC)

INTRODUCTION

The information herein was primarily drawn from university websites. For each university, it shows the name and address of that university, what degrees that university offers (e.g., a B.S. in Systems Engineering or a Ph.D. in Industrial Engineering), the academic unit that offers those degrees, the head of the academic unit offering those degrees, and a URL where more information can be found.

This is the second edition of the directory, reflecting many updates and additions since the first edition was released in early 2015. We plan to publish a new edition annually and welcome your help in correcting any errors in any of the information as well as letting us know about programs we have inadvertently omitted. In addition to a limited number of printed copies, the directory is posted online at both the INCOSE (www.INCOSE.org) and the SERC (www.SERCuarc.org) websites to enable broad distribution.

There were some challenges in deciding which programs to include because there are so many variations in how universities call their systems and industrial engineering programs, especially when looking across so many countries. We have tried to keep things simple. With a few exceptions, we included only programs with the title "Systems Engineering," "Industrial Engineering," or those with another field added on, such as "Operations Research and Systems Engineering." Generally, we did not include restricted systems or industrial engineering programs, such as "Computer Systems Engineering."

ACKNOWLEDGEMENTS

We wish to acknowledge the efforts of the following individuals as contributors to the compilation of the second edition of the Directory: LaShawn Adams, Alekhya Andar, Megan Clifford, Kristine Gallo, Christopher Klesges, Myriam Marcus and Art Pyster.

We also wish to recognize the efforts of the following individuals as contributors to the development of the first edition of the Directory: Megan Clifford, Kristine Gallo, Myriam Marcus, Pranav Patil, Art Pyster, Govarthanan Ravichandiran, Doris Schultz, and Harsh Shah.
